

Dear Student,

Congratulations! According to our records you have been recommended to take Pre-Calculus Honors during the 2014-2015 school year. You should find this course challenging and enlightening.

Since Pre-Calculus is an extension of Algebra II and a prerequisite for Calculus it is important that your Algebra II skills are strong. To keep your skills fresh, some review may be necessary. During the summer you will be required to complete assignments, which ***must be completed and turned in by Monday, August 25, 2014***. You will have access through my website <https://sites.google.com/site/gjhsgoodsonmath/pre-calculus-honors>. **In addition to the summer assignment, be prepared to take a fractions quiz without a calculator on the first day of school. You will be required to simplify, add, subtract, multiply, and divide fractions.**

It is recommended that you bookmark this website. It will be your responsibility to check this website and complete the work by the deadlines designated. Important information will be given to you about the first day of school and student expectations for the course. We realize that you will be active during the summer, so the assignment will be posted by the end of this school year. Please remember the assignment can be completed from anywhere that you have Internet access. If you have any questions, please e-mail Mr. Goodson at minter.goodson@polk-fl.net.

Based on this assignment if you feel that you need to be placed in a different level course, please contact your guidance counselor before school begins to have your schedule revised. Once classes begin, no level changes will be made until the end of the first semester. Please realize because this is an honors level course, the pace and depth will be fast, homework and reading the textbook will be required, and class participation is a vital part of the class.

✓ You will be expected to have a TI-83 Plus, TI-83 Silver, TI-84 Plus, TI-84 Plus C Silver or TI-84 Silver Edition graphing calculator. If this requirement poses a hardship, please contact Mr. Goodson.

We hope you find the review helpful. The time you spend reviewing will ensure the beginning of a successful year in Pre-Calculus Honors. We are looking forward to working with you. Enjoy your summer and remember to review!
